**Keep a deep bonding with your surroundings  
And bring magical changes....**

**Dear Children.....**

Mother Nature is fully furnished with beautiful and sophisticated creations of the supreme power to enrich and astonish the life of every living being. It is really miraculous and unique if we minutely observe. Sometimes the beauty of nature goes unnoticed and can only be sensed.

The unconditional love and care towards the environment has to be developed by making intimacy with the elements of nature. The nurturing of nature silently gives a sum total of peace and happiness. It also adds some colourful flavours in our life to lead a healthy life.

Look at your surroundings.....it is wonderful and rejuvenating with lots of macro to micro realities that embrace the heart. So, nature is an amazing and astonishing teacher, though it is not a real class room teacher. But a better artist who performs in all the weathers and conditions.

Loving Children,

Love your surroundings. Look and experience the abstract form and contribute the maximum for its holy and beautiful sustenance. If we do the caring it will repay and share the long lasting best to the future generations. And this would help each one of us to live a long period of healthy and happy life. So, keep nurturing the elements of nature by protecting it and getting the essence from its lap.

**Love Nurture and Nourish.... Nature  
Protect and save....A beautiful Environment  
For a Healthy and Happy life**

**Regards**

# THE GREAT HIMALAYAS

**This immense mountain range began to form 40 to 50 million years ago, when two large landmasses, India and Eurasia, driven by the movement of the tectonic plates, collided.**

- Himalaya Mountain is one of the highest mountains of the world. also known as Giriraj. The Himalayas were named by joining two Sanskrit words – “Hima” and “Alaya,” “Which means Hima=Snow and Alaya= Abode, meaning “Abode of Snow.” The Nepalese call Mt. Everest “Sagarmatha” which can be translated as “Goddess of the Universe” or “Forehead of the Sky.”
- The Himalayas is the only mountain range that expands across 6 countries. It touches the borders of India, Pakistan, China, Nepal and Bhutan. Geologically, Himalayas is alive because it moves around 20 mm every year.
- The Himalayas is the highest peak in the world. The height of the Himalayas is approx. 8848m (29,035 feet) above from the sea level. Famous peaks include Karakoram (K2), Kailash, Kanchenjunga, Nanga Parbat, Annapurna, and Manasklu.
- The Himalayas are the source for the Indus, the Yangtze and the Ganga-Brahmaputra. The main rivers sourced in Himalayas are the Ganges, Indus, Yarlung, Yangtze, Yellow, Mekong, and Nujiang.
- The Himalayas are the third largest deposit of ice and snow in the world, after Antarctica and the Arctic. There are approximately 15,000 glaciers located throughout the range. At 48 miles (72 km) in length, the Himalayan Siachen glacier is the largest glacier outside the poles. Glaciers located in the Himalayas include the Baltoro, Biafo, Nubra, and Hispur.
- There are five major vegetation regions: forest, grassland, tundra, desert, and ice sheet. In the lower forested zone, birch, juniper, blue pines, firs, bamboo and rhododendron grow. Some plants found in mountains are: Pine, Maple, Cedar, Oak, Deodar, etc.
- Animals that live on mountains include the snow leopard, Andean condor, bighorn sheep, chamois, ibex, mountain goat, mountain gorilla, chinchilla, alpine marmot, lynx, golden eagle, Vicuña and Himalayan Tahr. Mountain animals often have special adaptations for living in a cold, windy mountain climate.

# HARD WORK vs SMART WORK

"Talent is cheaper than table salt. What separates the talented individual from the successful one is a lot of hard work."

## HARD WORK:

Hard work makes you earn a great deal of respect and social recognition. Hard work is what you do after you have already put your regular work hours.

### BENEFITS OF HARD WORK

- ★ Help to achieve our goal.
- ★ Make living standards high.
- ★ Free from evils thoughts
- ★ Through hard work, we gain knowledge and experience. This will help us to do smart work that means we can then analyse shortcuts to do the same amount of work.
- ★ Work never fails

## SMARTWORK

Being a smart worker saves a lot of time as you find ways and means to reduce your work by using logical and innovative ways to achieve your goals.

### BENEFITS OF SMART WORK

- ★ It increases the worker's freedom and autonomy. It has a greater capacity to organize your time.
- ★ It saves your money on workspaces, transport or supplies (electricity, water, etc.)
- ★ You can save a lot of time on journeys, especially in big cities.

# Love food, Hate Waste

Without food there is no life. There are so many varieties of foods available all over the world.

Remaining food that is not eaten and thrown away is called food waste.

According to Food and Agriculture organization, 1.3 billion tons of food that is produced for human consumption is wasted annually.

Waste of food also occurs during storage due to Microorganisms.

Nutritional value of food is wasted during storage due to unfavourable weather conditions.

Food is meant for sharing, not for wasting.

Food is one of the most precious things given to us by god.

**REDUCE  
FOOD  
WASTE**

# FRIENDSHIP

★ People having true friends in life are really blessed with the most precious gift. True friends (one or two) are enough instead of having many friends who never understand the situation of the needy one. Friends are the real supporters in life who teach us how to face difficulties in life. They are the real well wishers of us who change our views about anything for good.

**Solanki Hardi – 8D**

★ The need for good friends is ageless. It is rightly said that being around the right type of friends increases our sense of belonging and boosts our confidence while decreasing our stress and anxiety level.

**Makvana Kanishka- 5 Venus**

★ Real and true friends become the pillar of strength for us who always give us the needed emotional support and physical support.

**Sharma Rudra-5 Olive**

★ Friends reduce stress, make us laugh, help understands and motivate us to take care of ourselves and reach higher goals. Friendship makes life more enjoyable and enriches one's everyday experience.

**Patel Kavya - 6 Oak**

★ Life is meaningful with good friends by our side. But choosing the good one is important. Your friendship should motivate you, inspire you and help you be a better person.

**Solanki Jenil - 7 Oak**

# SHARING IS CARING

Caring means you are willing to put the needs of other first. Sharing is the joint use of resource or space. It is also the process of dividing and distributing. So caring and sharing means if you share, you actually care for the person.

The act of caring for another is very powerful because it creates deeper bonds as individuals lean on each other for emotional support. It also teaches important virtues such as patience, understanding and loyalty that benefit individuals in both their personal and professional lives. Being caring allows you to have empathy for others and to live a life.

**Dhyana C.Vaghela**      **5<sup>th</sup> Olive**

Sharing is an act that equates to caring. Caring means showing that you care about other people. These both make any relation stable and healthy. The act of caring and sharing are most powerful acts in the world. It's a kind of love that we spread all over the world. Sharing is vital life skill.

Sharing means building a beautiful bond between two persons. This also bring happiness and peace in our life when we share our feelings, knowledge and possession with others.

It makes you selfless, humble and empathetic towards others which makes you a well-adjusted person. The practice of sharing makes you understand when someone else is in need without them telling you the same. It gives you a sense of responsibility towards the society. Sharing not only shows that you care for others but also help in self-development.

"Great satisfaction comes from sharing with others."

**Neel Bhope**      **8<sup>th</sup> C**

**“An Investment in knowledge pays the best Interest.”**

“Knowledge is Power” means that a man has education and a control on his life by using the strength of Knowledge.

The ability to acquire knowledge, preserve and pass it on to the future generation makes man powerful.

It enables him to control the forces of nature and use them for his benefit.

Knowledge is something that is so powerful that it can destroy the whole earth and on the other hand is a tool that can restore the balance on the earth.

A knowledgeable person is the richest person on the earth because no one can steal his/her knowledge. But anyone can easily steal your money and power from you any time.

Knowledge never decreases on use and only increase with time. Accordingly, a knowledgeable person is more important than a rich person because a rich person can give money to the nation but a knowledgeable person can give knowledge to the nation and this knowledge can also increase the wealth of the nation.

“Knowledge is not power, it is only potential. Applying that knowledge is power.”

Understanding why and when to apply that knowledge is wisdom.

# POWER OF SILENCE

Quietness is a choice to be more outspoken in specific scenarios or more withdrawn in others based on psychological safety situation. Moreover silent people prefer to feel safe to express their reviews without the fear of being judged by others wrongly & waste energy to prove every word they say.

**“Silence speaks louder than Words”**

Allowing silence in a talk puts pressure on the other person. Generally in every conversation, both parties speak. But if silence has entered in your conversation, it will surely speak the truth or encourage you to speak up.

Silence can be an indication of empathy .When we are tuning in how the other person is feeling about what they're saying, we're listening more to the tone of their voice, cadence & speed rather the actual words & replying with words would not be the perfect response. Being a quiet person is the freedom to be yourself .It's a sane choice that can earn many benefits:-

- Avoid being judgmental.
- Pause & control the situation
- Being attractive than others.
- You can spend more time getting to know yourself.
- Learning from others quickly

We live in a world full of noise and chatter. A world wherein our daily routines are inundated with distractions and responsibilities. When you see your vision come to life, this ultimately gives you confidence and a deeper understanding of who you are. You learn to trust yourself, are able to count on your decisions, and feel more secure amid the noise and uncertainties around you.

# RECYCLING

Recycling is important for saving the earth. Reusing, reducing and recycling are the three important R's of Recycling.

The more we recycle, the less garbage winds up in our landfills and incineration plants. By reuse in aluminium, paper, glass, plastics and other materials, we can save production and energy costs, and reduce the negative impacts that the extraction and processing of virgin materials has on the environment.

The process of collection of waste materials and then breaking it down into small by products for making new products is known as recycling.

It helps in conserving natural resources like coal, oil and gas.

Recycling of the paper reduces air pollution as it would spare millions of trees.

Recycling of the rainwater helps in maintaining the underground water and smaller aquatic bodies like ponds and rivers.

It also helped in creating job opportunities in manufacturing industries in many countries around the globe.

Technology plays a significant role in recycling through advanced waste management programs using innovative tools and software. Recycling helps to build a sustainable planet for future generations by reducing different types of pollution like air, land and water
